

Data Sources

Note: The following data sources are proposed as part of the current implementation scope. Final inclusion may vary based on internal SOPs, dependency availability, documentation of readiness, and timeline constraints.

In addition to the below sources, synthesized mock internal SOP documents will be created based on the requirements.

1. IT DEPARTMENT DATA SOURCES

Data Type	Source / Link	Description
IT Support Tickets	Hugging Face: IT Support Tickets	Synthetic IT tickets that can be used as data source for IT tickets.
IT Troubleshooting	IT troubleshooting tickets	A structured dataset of IT troubleshooting scenarios with symptoms, causes, solutions, and documentation for building intelligent technical support and automation systems.

2. HUMAN RESOURCES (HR) DATA SOURCES

Data Type	Source / Link	Description
HR Policies	startuphrtoolkit.com	Standard details regarding HR policies: leave, performance reviews, compensation, code of conduct. Free templates.
Onboarding Checklists	internshala	Guide on onboarding checklists
Leave Management	Company HR System	Leave policy
Benefits Info	HR Internal Wiki <i>Confluence / Wiki</i>	Employee Benefits document

3. OPERATIONS & FACILITIES DATA SOURCES

Data Type	Source / Link	Description
Facilities & Safety	Safety & OSHA <i>OSHA / Safety</i>	Health & safety policies, incident reporting, OSHA compliance, fire drills, ergonomics

4. ENGINEERING & PRODUCT DATA SOURCES

Data Type	Source / Link	Description
Code documentation	Our Documentation Python.org	Python official Docs
Code Documentation	GitHub wiki	Architecture decision records (ADRs), API docs, deployment guides, coding standards
API Specifications	OpenAPI / Swagger <i>Swagger Hub</i>	REST API specs, GraphQL schema, webhooks, rate limits, authentication. Auto-generated.
Infrastructure	Runbooks / Architecture <i>Confluence</i>	System architecture, deployment, incident response, disaster recovery. Critical for SRE.
